EDSUKBAP14 is a self contained DDA Complaint (when constructed as such) swing gate, constructed of either tubular wing or box section wing.

The gate wing can be low profile or full depth, from 200mm in height to a 1500mm, with the standard clear plexi-glass infill panel, this can be substituted for opaque, mesh, vertical or horizontal bar.

The EDSUKBAP14 Gate can be customised to suit most applications and can have vertical or horizontal tube infill panels, trombone "P" section infill to allow pictograms to be added (as per the chrome gates), glass infill (as pictured) or a blank panel or corporate logos or advertising space. The EDSUKBAP14 can be finished in Stainless Steel, Mild Steel & Galvanised and/or powdercoated. Optional locking in the open/closed and middle positions can also be provided.

The gate can be custom made to suit most environments and can be installed internally or externally.

Automatic options are available and further details can be obtained from our sales team.
