# Domestic, Commercial & Industrial

All types of domestic, commercial and industrial installations are undertaken, from additional sockets and lighting point to complete rewires and design & build schemes.

Our skilled technicians support the process from start to finish, including all commissioning, calibration and testing requirements.

**EDS** personnel carry out a wide range of activities from basic PAT (Portable Appliances Testing), where all portable appliances are regularly tested, through to the testing of the building wiring, equipment, switchgear etc, fitted to the fabric of the building, which must be tested at regular intervals, different sites require differing frequencies of visits.

**Domestic** We are able to offer full test and inspections of the electrical installations for home buying service, detailing the exact state of the installation, allowing you to make an informed decision.

Complete rewires, electric storage heating, security lighting, decorative & fibre optic lighting, security systems, automated gates, pool and sauna supplies.

**Commercial & Industrial** services including lighting design schemes, power distribution, un-interruptible power supplies, Power, instrumentation & communications cabling, fire alarm & emergency lighting. Pneumatic and PLC control panel manufacture, ladder racking networks, conduit and trunking systems, machinery supplies, through to integrated plant maintenance care packages. We are also able to cater for localised on-site sub-station power requirements.

## Specialist Services:

- Preventative maintenance and breakdown cover
- Fault finding and rectification work
- Specialised equipment and process support
- Performance recording and analysis
- Electrical testing & calibration service

**EDS** also provides Physical Security in the form of Rising Kerbs, Barriers, Gates, Roller Shutters, Grills & Bollards. Electronic Security such as Access Control, Intruder and Fire Alarm Systems all linked together using our Building Management control systems and integrating into PC Networks – seamlessly.
